WipFrag® 4 Cross-Platform Particle Analysis Software

Because you can't manage
what you can't measure.

WipWare presents WipFrag® 4, the most powerful solution for the industrial operation's continuous improvement. The most cost-effective and accurate fragmentation analysis platform in the world, WipFrag instantly analyzes images for particle size, shape and colour and shares results across all of your devices seamlessly.

More than just an innovative fragmentation analysis software, WipFrag is the the HMI (Human Machine Interface) for the cutting-edge technology of Reflex™ and Solo™ online systems. WipFrag® 4 introduces the new WipWare Account which synchronizes all of your WipWare device data for easy access and versatility.

WipWare Account

HMI Human Machine Interface

The WipFrag Human Machine Interface is a cross-platform, secure and robust autonomous system that allows offline data collection and/or online cloud synchronization to integrate easily into your process. This key feature is extremely valuable in operations where technicians and engineers cooperate remotely.

GIS Geographic Information System

Compatible with drones to quickly and safely generate comprehensive data with precise geographic information, WipFrag merges analysis data in an intuitive Geographic Information System database in which the user can access time and location information for every analysis.

AI Improved Edge Detection Engine

A new and continuously improving edge detection algorithm uses the latest in artificial intelligence and deep learning technologies to guarantee increasingly accurate analysis results, and an intelligently refined engine lets WipFrag take advantage of the latest LIDAR and ToF smartphone technologies.

UX/UI Improved UX/UI

- Full customizable reports • Dark mode interface • Built-in self-help resources • Cloud synchronization
- Multilingual interface: English, French, Spanish, German, Portuguese, Russian, Chinese, Italian and Hindi.

Using WIPFRAG is as easy as 1-2-3.

1 - Open photograph and set the scale.

2 - Generate the net and adjust edge parameters as necessary.

3 - Output the results.

BUY Payment Options

Annual Subscription - Unlimited analyses for 1 year

Image Credits / Pay per use - Credits can be used to analyze your own images or to submit your images to our MailFrag Online Analysis Service.

Image Analysis	Annual Subscription	Pay as you go
Price	\$ 1495/year	\$12/Credit
Single Image	Unlimited	1 Credit
UAV/Orthomosaic Image	Unlimited	3 Credits

- *Credits must be purchased to complete the analysis process. In-app analysis credit purchase only.
- *Annual Subscription does not include MailFrag. Must be purchased through WipWare account.
- *UAV/Orthomosaic images must be analyzed with Windows version.
