

WipFrag⁴

IMAGE ANALYSIS SOFTWARE

Because you can't manage what you can't measure![™]

Measure particle size, shape, and colour anywhere:
underground, on the surface and from the air

Use WipFrag in 3 easy steps:

1. Capture / import photo

2. Analyze material

3. Output results

Intelligent & Intuitive

- Use your mobile device to find material size in moments from a safe distance, no scale reference needed
- Our best edge detection algorithm yet uses deep learning to measure particles quickly and accurately
- Generate particle size and shape distribution reports with material colour detection and volumetrics
- Easy-to-use and available in English, French Spanish, German, Portuguese, Chinese, Hindi and more

Aerial Advantage

- Import orthomosaic images or compile them directly in WipFrag using source images from your flights
- Analyze large areas from multiple perspectives for the most comprehensive fragmentation data
- Track detailed trends by time and location in a built-in GIS to see when & where performance is best

WipWare Ecosystem

- Sync your data to the cloud with a free WipWare Account and share with ease
- Link your WipWare Account to up to 10 devices and work from anywhere
- Connect to WipWare Solo and Reflex systems with WipFrag as the HMI
- Submit your images to our MailFrag service when you need another opinion

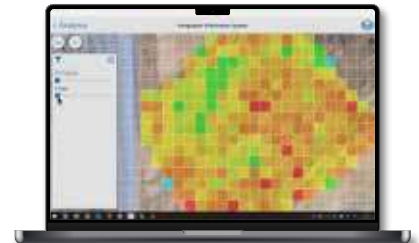

Collect data, complete analyses, and share results with WipFrag on any device:

Phone: Capture photos with automatic scale and location

Tablet: Edit analyses with advanced touch features

PC: Process and analyze aerial orthomosaic images

Flexible Payment Options

Annual Subscription: Full unlimited access to all WipFrag analysis features for 1 year.

Pay-Per-Use Image Credits: Analyze images or submit to MailFrag in exchange for image credits.
